

Husky Unleashes New iPhone Application for Fuel Purchases, Rewards

Husky Energy has announced a new iPhone application for its retail customers, who can now pay for fuel and car wash purchases directly and securely from their car without inserting a payment card at the pump.

“The myHusky app provides a whole new level of convenience and security for our retail customers,” said Lawrence Richler, Husky’s Vice-President of Canadian Products Marketing. “Husky is amongst the first in the Canadian fuel industry to offer mobile pay-at-the-pump service with e-receipts, and you’ll never miss out on rewards points.”

The myHusky app is now available as a free download for iPhone users in the App Store:

<https://itunes.apple.com/ca/app/myhusky/id1380410851>

myHusky Rewards members who add their card to the app collect points automatically when they use mobile pay at the pump and can instantly redeem for free fuel and car washes. With a digital version of their rewards card in the app, customers no longer need to carry their plastic cards.

Here’s how it works:

- A built-in station locator helps users find nearby Husky locations
- Before fueling, users select their pump number in the app and pay from their car
- If available, users can purchase and receive a car wash code through the app
- The app provides E-receipts and transaction history

Husky worked with IBM Canada, one of its digital innovation partners, to design, develop and manage this enhanced customer experience. The technology is now available at nearly 500 Husky-branded retail outlets across Canada.
